

Catford Green // Glen Howell Architects [London, UK]
The materiality of the top floor outlines a distinctive top expressed through articulated metal panels which provide rhythm and depth to the facade.

Mia Dorcol // Zabriske Studio [Belgrade, Serbia]
Variety and depth are introduced in the facades with recessed reveals, various brickwork patterns and subtle changes in the materials.

Amaryllis House // Tegnestuen LOKAL + Mangor & Nagel [Copenhagen, Denmark]
A palette of red and brown bricks with recessed panels give the building a clear, legible and expressive relief from a distance that reduces the scale of the building. The same brick is used on all sections of the building, but detailing, mortar-type and color vary creating a clear distinction between the facades.

Hulme Living Leaf Street Housing // Mecanoo Architects [Hulme, UK]
Fluted brick detailing visually reduces the scale of the building and creates a dynamic rhythm in the facade as the building volume meanders across the plot and gradually decreases in scale to the north.

Avenier Cornejo 88 Housing Units // Avenier Cornejo Architectes [Paris, France]
Each building has a distinct shade of brick - anthracite grey, light grey and red - as well as metal detailing of windows, shutters and balustrades in different metallic shades contributing to an impression of diversity and homogeneity at the same time.

BLOCK C WEST ELEVATION

Not to Scale

- Brickwork laid vertically in stacked bond. Colour will vary on each block, see below site elevation
- Pressed Metal Parapet Capping to selected RAL to match windows
- Acrylic Render to selected RAL. Colour will vary on each block to tie in with brickwork
- Dark grey steel balustrade to selected RAL to match windows
- Dark grey steel balcony structure to selected RAL to match windows
- Dark grey windows to selected RAL
- Brickwork laid in running bond. Colour will vary on each block, see below site elevation
- Brickwork laid vertically in stacked bond, recessed 15mm. Colour will vary on each block, see below site elevation
